Update on Application Processing

Due to numerous spring graduations, a significant volume of applications is being submitted at this time. Therefore, DOPL is experiencing a considerable backlog of applications waiting to be processed for the following professions.

As of June 14, 2006:

Nursing:	currently working on applications submitted May 16
Pharmacy:	currently working on applications submitted May 16
Physicians:	currently working on applications submitted May 16
Cosmetology:	currently working on applications submitted May 30
Dental:	currently working on applications submitted May 24

The processing time for most other applications is approximately 14 business days, if a complete application has been submitted.

Before calling DOPL to determine where your application is in line for processing, we encourage you to periodically check this website first in order to provide our technicians more time to process applications instead of fielding phone calls regarding these status updates.

We apologize for the delays being experienced and understand the vital importance of getting applications approved in a timely manner. Therefore, you can be assured that we have committed every resource available to process these applications as quickly as possible.

Thank you for your patience and understanding.
